Evaluation Criteria	Existing Union Station	Union Station South – Through	Union Station South-Stub Configuration	Los Angeles River – West
<i>Minimize Operating and Capital Costs.</i>				
Length	<ul style="list-style-type: none"> Shortest distance to northerly I-5 (Options 2 and 3) connections to Bakersfield. 	<ul style="list-style-type: none"> Long, looping alignment required to southerly (Option 3, 3A, 4, and 5) connections to San Diego. 	<ul style="list-style-type: none"> Shortest distance to UPRR/EI Monte (Option 1) connection to San Diego. Long, looping alignment required to southerly (Option 3, 3A, 4, and 5) connections to San Diego. 	<ul style="list-style-type: none"> Shortest length to most connections to Bakersfield and to San Diego.
	3	2	2	5
Operational Issues	<ul style="list-style-type: none"> Not suitable for easterly SR-60 (Option 1A) and westerly SR-101 (Option 2) connections to San Diego and LAX, respectively. Connection to easterly UPRR/EI Monte (Option 1) alignment requires stub-end station. 	<ul style="list-style-type: none"> Best Station Location alternative for easterly UPRR/EI Monte (Option 1) alignment connection. Slow approach speeds. Not suitable for easterly I-10 (Option 1B) connection to San Diego. Requires loop around UP Los Angeles Yard to provide through-track to southerly (Options 3, 3A, 4, and 5) connections to San Diego. 	<ul style="list-style-type: none"> Not suitable for easterly I-10 (Option 1B) connection to San Diego. Not suitable for northerly I-5 (Options 2 and 3) connections to Bakersfield. Offers through-track alternative for westerly SR-101 (Option 2) connection to LAX. 	<ul style="list-style-type: none"> Offers high-speed alignment through station. Not suitable for northerly I-5 (Options 2 and 3) connections to Bakersfield. Not suitable for easterly SR-60 (Option 1A) and westerly SR-101 (Option 2) connections to San Diego and LAX, respectively. Connection to easterly UPRR/EI Monte (Option 1) alignment requires stub-end station.
	4	3	2	5
Construction Issues	<ul style="list-style-type: none"> Requires modification of existing LAUS approaches (Amtrak, Metrolink), under live track conditions Maintenance of adjacent rail and highway traffic. 	<ul style="list-style-type: none"> Construction over LA River. Access through existing LAUS. Maintenance of adjacent rail and highway traffic. 	<ul style="list-style-type: none"> Highway access Maintenance of adjacent rail and highway traffic. 	<ul style="list-style-type: none"> Rail access, but difficult highway access.
	2	3	3	3
Capital Cost	<ul style="list-style-type: none"> Significant aerial structures. 	<ul style="list-style-type: none"> Significant aerial structures. Loop connections add to cost. 	<ul style="list-style-type: none"> Significant aerial structures. 	<ul style="list-style-type: none"> At-grade approaches, aerial facilities.
	2	1	1	3

Evaluation Criteria	Existing Union Station	Union Station South – Through	Union Station South-Stub Configuration	Los Angeles River – West
Right-of-Way Issues/Cost	<ul style="list-style-type: none"> Catellus property. Railroad relocation. At grade. Through tracks in CRA redevelopment area affect major development parcel. 	<ul style="list-style-type: none"> Span of Los Angeles River. CRA redevelopment area. Relocation of existing businesses. 	<ul style="list-style-type: none"> CRA Redevelopment area. Relocation of existing businesses. 	<ul style="list-style-type: none"> Requires relocation of existing MTA bus facility. Adjacent to penal facilities and law enforcement center.
	2	2	3	1
<i>Maximize Compatibility with Existing and Planned Development.</i>				
Land Use Compatibility and Conflicts	<ul style="list-style-type: none"> The proposed station location would be located at the existing Union Station site at Alameda and Cesar Chavez Avenue. Both are Major Class II Highways planned to at least 4 lanes wide. These streets may have to be expanded to accommodate the station. The station site is proposed within the Alameda Specific Plan area. In order not to conflict with the buildout of the Alameda Specific Plan, the station support facilities could be located south of the station in the Little Tokyo area. The location of support facilities in Little Tokyo may conflict with Los Angeles Community Redevelopment Agency Plans for Little Tokyo. The station would also be located within an area designated for Light Industrial land use. Station can be configured to provide a new pedestrian connection over SR-101 directly into existing Union Station. 	<ul style="list-style-type: none"> Station platform would straddle the Los Angeles River. The proposed station location is along E. Commercial St. and Alameda Blvd. Both may have to be expanded to accommodate the station location. The surrounding land use is Light Industrial and Commercial Manufacturing and Open Space. The station site can be configured to be compatible with Los Angeles Community Redevelopment Plans for Little Tokyo. The plans concur with MTA plans. The station site can be configured to provide a new pedestrian connection over SR-101 to Patsouras Transit Plaza. With a pedestrian connection there is a high potential for intermodal transfers to/from Union Station Amtrak and Metrolink, MTA Red Line, Pasadena Blue Line, proposed Eastside LRT, El Monte Busway and MTA Gateway. 	<ul style="list-style-type: none"> The proposed station location is along E. Commercial St. and Alameda Blvd. Both may have to be expanded to accommodate the station location. The surrounding land use is Light Industrial and Commercial Manufacturing and Open Space. Because it abuts Alameda Street, this station site may conflict with Los Angeles Community Redevelopment Agency Plans for Little Tokyo. The plans may not be compatible with MTA plans for the Eastside LRT. Station can be configured to provide a new pedestrian connection over SR-101 to Patsouras Transit Plaza. With a pedestrian connection there is a high potential for intermodal transfers to/from Union Station Amtrak and Metrolink, MTA Red Line, Pasadena Blue Line, proposed Eastside LRT extension, El Monte Busway and MTA Gateway. 	<ul style="list-style-type: none"> The proposed station location may require the expansion of Cesar Chavez Avenue. The surrounding land use is Light Industrial. The station site would conflict with existing use of part of the area as a bus facility. The proposed station location would also conflict with the bus yard's proposed use as an MTA light rail repair facility in conjunction with the Eastside LRT extension. Access to the intermodal facilities through adjacent area occupied by penal and law enforcement facilities may prove difficult. There is a potential for intermodal connections with Union Station Amtrak and Metrolink, MTA Red Line, Pasadena Blue Line, proposed Eastside LRT, El Monte Busway and MTA Gateway. Area is included in LA River Greenbelt planning effort.

Evaluation Criteria	Existing Union Station	Union Station South – Through	Union Station South-Stub Configuration	Los Angeles River – West
	<ul style="list-style-type: none"> Plans for station through tracks crossing SR-101 may conflict with CalTrans plans for through tracks for Amtrak. There is a very high potential for convenient intermodal connections due to presence of Union Station Amtrak and Metrolink, MTA Red Line, Pasadena Blue Line, proposed Eastside LRT, El Monte Busway and MTA Gateway at the site. 	<ul style="list-style-type: none"> Area is included in Los Angeles River Greenbelt planning effort. 	<ul style="list-style-type: none"> Development of this station site conflict with CalTrans plans for through tracks for Amtrak. 	
	4	4	4	3
Visual Quality Impacts	<ul style="list-style-type: none"> Commercial /industrial area. No sensitive viewers. 	<ul style="list-style-type: none"> Industrial area. On north end, both sides of Spring Street, approach goes through the edge of Downey Playground. 	<ul style="list-style-type: none"> Commercial /industrial area. No sensitive viewers. 	<ul style="list-style-type: none"> Industrial area. No sensitive viewers.
	5	4	5	5
<i>Minimize Impacts on Natural Resources.</i>				
Water Resources	No Impacts.	No Impacts.	No impacts.	Potential minor impacts on water quality during construction, avoidance feasible.
	5	5	5	4
Floodplain Impacts	No impacts.	Requires construction of approach tracks across Los Angeles River.	Requires construction of approach tracks across Los Angeles River.	Requires construction of approach tracks across Los Angeles River.
	5	3	3	3
Threatened & Endangered Species Impacts	No impacts.	No impacts.	No impacts.	No impacts.
	5	5	5	5
